LAB TEST 2

SAMPLE for March 2017

This is a 2-hour-30-minute lab test

Students arriving more than 10 minutes after the start of their lab test will not be permitted entry.

The test is fully open book

PLEASE SAVE YOUR WORK FREQUENTLY ...

Instructions for preparation and submission of work

This test will be marked out of 100 marks

Answer ALL questions

Unless asked otherwise use the PHP namespace: **Itb**

You may either submit a single project (implementing all questions), or separate folders, one per question. It is recommended that you answer the questions in the order presented.

Do NOT submit more than one folder per question – multiple attempts at the same question will not be graded.

NOTE:

- At the end of the test:
 - Save all your work
 - Close all your applications
 - ZIP up your web root folder and submit the single ZIP file
(the lecturer will indicate how the file is to be submitted)
 - Submit only a ZIP file (i.e. 7zip or Rar etc. will not be accepted)

Do not leave the test room until the lecturer has confirmed your files have been submitted – if you leave before doing so then you risk the chance that your files have not been received for marking and you would score zero.

Class **Book** (and documentation web pages) are provided in the files for this test.

Data items used in this exam

id	1239
title	brown
image	father_brown.jpg
total pages	320
index pages	25

id	8761
title	marple
image	miss_marple.jpg
total pages	201
index pages	11

id	3003
title	holmes
image	sherlock_holmes.jpg
total pages	432
index pages	30

You have been provided with a non-MVC site, which retrieves all Book objects from a BookRepository object and displays them as an HTML table.

You are to refactor the provided site into an MVC web application, demonstrating:

- a single front controller, Silex routing and Twig templating
- a WebApplication class (extending Silex Application)
- aborting and/or forwarding requests
- controllers as classes

Note

the provided folder has already had the Twig and Silex vendor packages installed via Composer.

Question 1 – basic routes**25 marks**

Implement the following routes:

/

- a welcome message
- a link to the list page

/list

- an HTML table listing all books
- make the first column of the home page a link to the ‘show’ page passing the book’s **id**

/show/<id>

- show details of one book record as headings and paragraphs
- where <id> represents the numeric id of the record to be displayed

Question 2 – database driven**25 marks**

Refactor class BookRepository to work with book details in a MySQL database.

Question 3 – improved structure**25 marks**

(if you have not already done so ...) Please refactor your code to have the following:

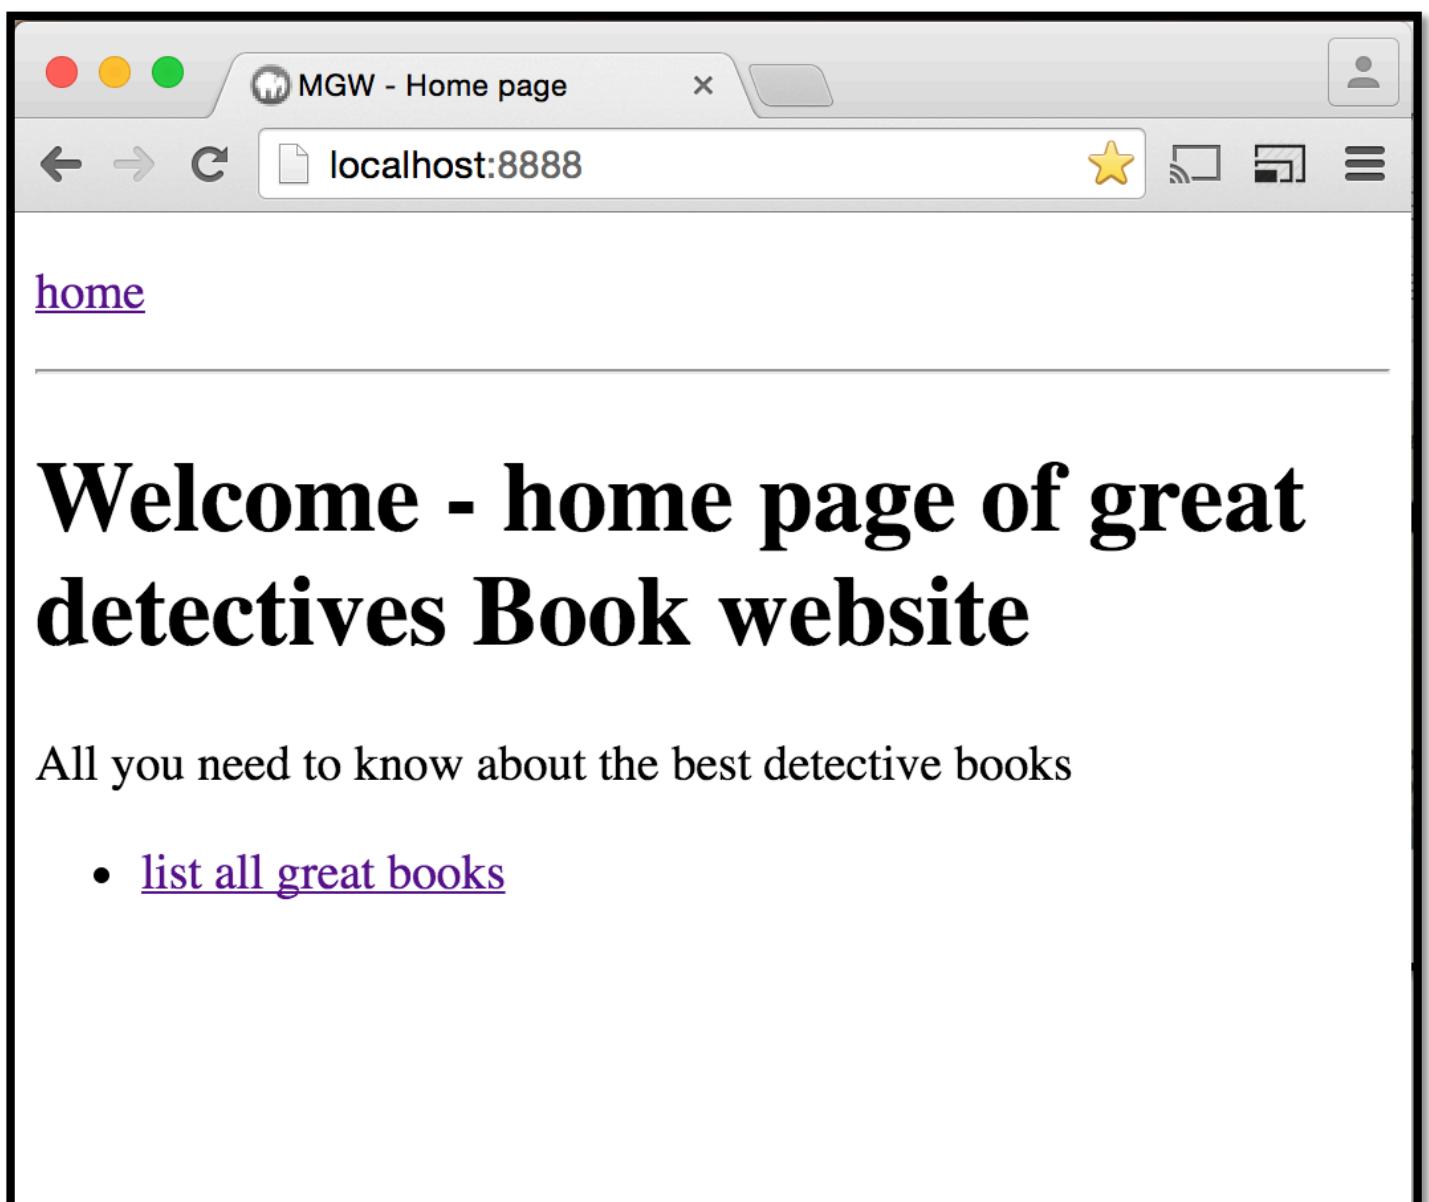

- Twig template inheritance has been used
 - so all child pages extend a base template, that declares HTML head, title, etc.
- separate the MCV components into their own directories, with their own namespace subsnamespaces (and update code / composer correspondingly)
 - model classes in **/src/model**, with namespace **Itb\Model**
 - controller classes in **/src/controllers**, with namespace **Itb\Controller**

Question 4 – error handling**25 marks**

Refactor your answer to cope elegantly with the following error situations:

- if the **id** for a non-existent book is received by the show route (404 error with message)
- if route **/show** is requested with NO id at all (400 error with message)
- if a route is requested which does not match any that have been defined
 - i.e. cope with 404 – not found errors

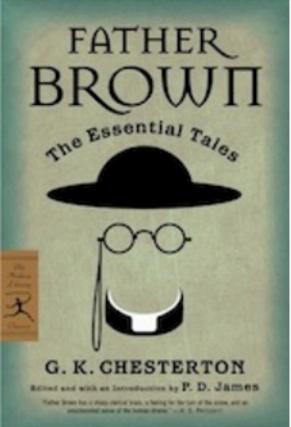

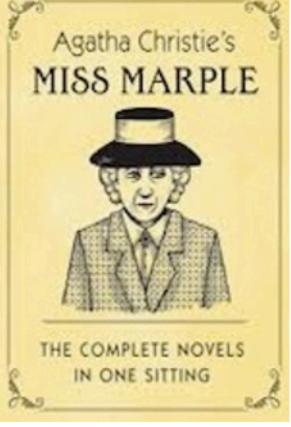

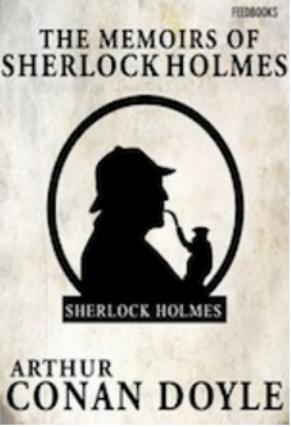

Screenshot – home page

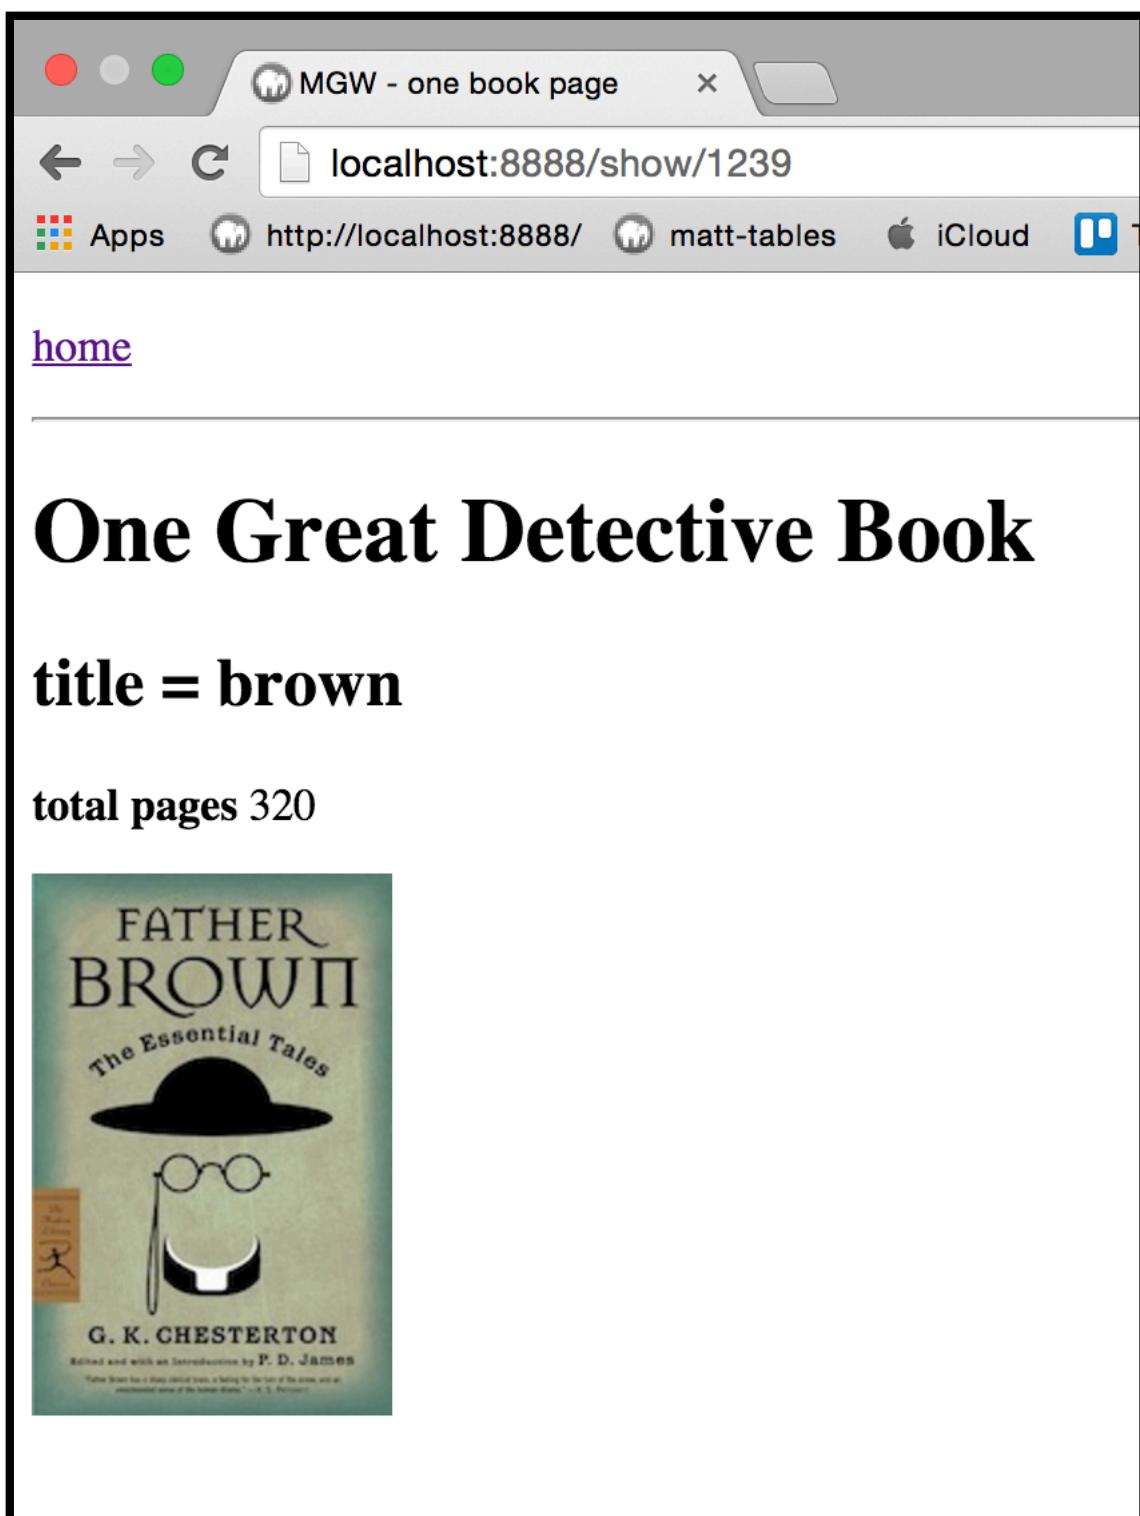

Screenshot – list all books

Screenshot of a web browser displaying a list of detective books. The browser window title is "MGW - list page" and the URL is "localhost:8888/list". A link to "home" is visible.

Great Detective Books

<u>brown</u>	 The book cover for "FATHER BROWN: The Essential Tales" by G. K. Chesterton features a black bowler hat and round glasses. The author's name is at the bottom.
<u>marple</u>	 The book cover for "Agatha Christie's MISS MARPLE: THE COMPLETE NOVELS IN ONE SITTING" features a portrait of Miss Marple wearing a hat and coat.
<u>holmes</u>	 The book cover for "THE MEMOIRS OF SHERLOCK HOLMES" by Arthur Conan Doyle features a silhouette of Sherlock Holmes smoking a pipe.

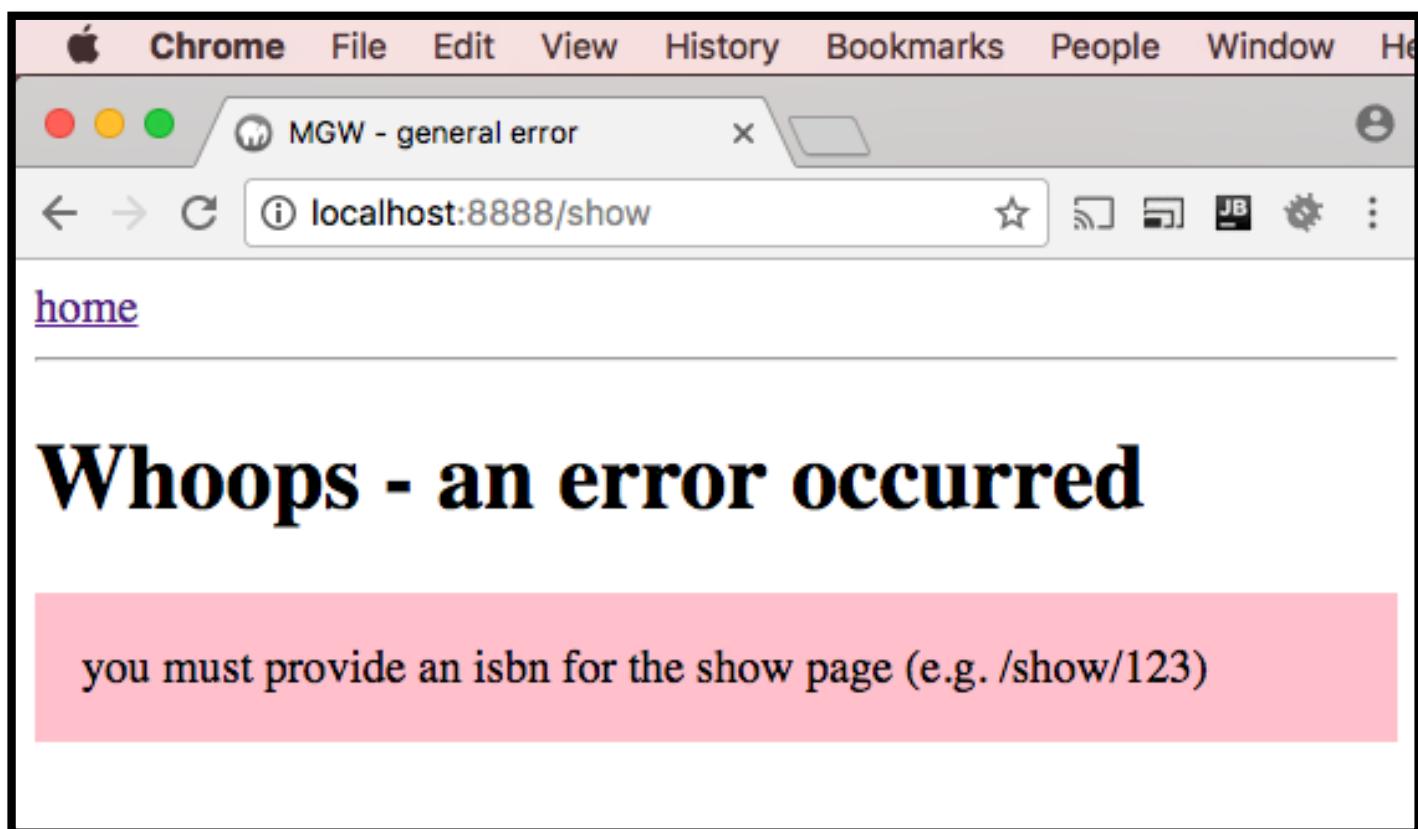

Screenshot – show book for a given ID (book exists)

Screenshot – show book for given ID, BUT no book for that ID

Screenshot – show book for given ID, BUT no id provided

Screenshot – bad route (no such page)
